Tokyo Contacts
with Shotaro Yamaguchi & Kevin Pfaff

Tokyo Contacts

Tokyo Contacts began as a quiet refusal: Bennie Julian Gay, Kevin Pfaff, and Shotaro Yamaguchi turned away from the conventional choreography of fashion, more instead for something looser, more instinctive, a different modus operandi. They moved through the industrial edges of East Tokyo's harbour under grey skies, gathering what and who they could along the way.

The images carry their own evidence of making: four women, their names of making scrawled across t-shirts, the faint geometry of the city pressing in. Nothing is immediate, almost interruptive, a conversation over. Each frame feels closer, unfolding between people, place, and process. In turning away from polish, Tokyo Contacts draws closer to something else: a raw, unguarded trace of the moment, and of those who shaped it.

Tokyo Contacts

Tokyo Contacts began as a quiet refusal: Bennie Julian Gay, Kevin Pfaff, and Shotaro Yamaguchi turned away from the conventional choreography of fashion, searching instead for something looser, more instinctive, a different modus shaped as much by constraint as by freedom. They moved through the industrial edges of East Tokyo's harbour under grey skies, gathering what and who they could along the way.

The images carry their own evidence of making: four women, their names and dates scrawled across t-shirts, the faint scars of manual processes, the hard geometry of the city pressing in. Nothing is smoothed over. Each frame feels immediate, almost interruptive, a conversation unfolding between people, place, and process. In turning away from polish, Tokyo Contacts draws closer to something else: a raw, unguarded trace of the moment, and of those who shaped it.
